

## MM63 Parts Kit Add-On

### What's Included:

It includes almost everything you need to build 1 reactor and 1 wash tank. That's enough to fuel a personal vehicle or two...or three.

#### - Pumps

- Pipes
- Valves
- Fittings
- Insulation
- Heaters
- Tubing

And More ...

**MM63 Parts Kit weighs 70 Pounds!**

### What's Not Included:

You will still need to purchase

the drum,  
structural steel,  
electrical control system  
and wire.

Most people use regular household light switches, boxes, etc. You'll need a sheet of steel to make the cone but you can use bed frame steel to make the legs and any brackets you might need.

**Technical Support is Included and provided by the author of the plans**
